- https://github.com/newsun0408-art
- Binh Thanh, Ho Chi Minh

Skills

Backend
- Java Spring Boot
- FastAPI (Python)
- Node.js
- RESTful API
- Docker

Frontend
- ReactJS (Vite)
- Tailwind CSS
- Responsive Design
- Redux Toolkit

Databases
- MongoDB
- MySQL

Security & DevOps
- Spring Security
- OAuth2
- JWT

Languages
- English (B1 Intermediate)

Profile

Final-year Information Technology student at HUTECH University with a strong foundation in Full-stack Web Development. Passionate about building scalable applications using **Python, Node.js, Java Script, React, and Deep Learning**. Experienced in collaborative environments and version control with Git. Seeking a Software Engineering Internship to contribute to innovative projects.

Projects

Chest X-ray 14 Disease Diagnostic System

09/2025 - 10/2025

Role: Full-stack Developer

Backend & AI Integration
- **Architected and developed** a high-performance RESTful API using **FastAPI** to handle medical image inference requests.
- **Integrated a Deep Learning model (ResNet50)** into the production pipeline, optimizing model loading and inference latency for real-time processing.
- **Engineered core endpoints** (/predict, /health, /debug_check) and implemented **CORS middleware** to ensure secure and seamless cross-origin communication.

Frontend Development
- **Designed and implemented** a modern, responsive user interface using **ReactJS (Vite)** and **Tailwind CSS**.
- **Developed an intuitive image upload system** with real-time prediction displays and customizable **confidence threshold settings** for clinical flexibility.

DevOps & Deployment
- **Containerized** the entire application stack using **Docker** and orchestrated a multi-container environment with **Docker Compose**.
- **Configured Nginx as a reverse proxy** to enhance system security, load balancing, and production stability.

TaskFlow

02/2036 - 03/2026

Role: Full-stack Developer

Backend & Infrastructure
- **Architected and implemented** a robust RESTful API using **Spring Boot 3** and **MongoDB**, following the Model-Service-Controller-Repository pattern for high maintainability.
- **Engineered a comprehensive Security Layer** with **Spring Security and JWT**, supporting Role-Based Access Control (RBAC) for Admin, Manager, and Employee levels.
- **Developed a core Task & Project Management engine** featuring automated status tracking, deadline monitoring, and project-based access control.
- **Integrated an automated Notification System** and **Spring Mail** services to enhance user engagement through real-time alerts and secure password recovery flows.
- **Designed optimized database queries** using Spring Data MongoDB to handle complex data retrieval for messaging and notification modules efficiently.

Frontend & User Experience
- **Developed a modern, responsive SPA** using **React 19 (Vite)** and **Bootstrap 5**, ensuring seamless performance across different device types.
- **Implemented a modular Component Architecture**, creating reusable UI elements such as real-time Chat Panels, Notification Bells, and dynamic Dashboard views.

- **Built a secure Routing System** with PrivateRoute wrappers and automated **Axios Interceptors** for centralized JWT management and 401 error handling.
- **Designed intuitive Dashboards** tailored to specific user roles, enabling efficient task delegation for Managers and streamlined workflow tracking for Employees.
- **Integrated a Project-based Group Chat** feature, allowing real-time collaboration and secure communication within specific project environments.

Education

Software Engineering 2022 - 2026

9/2022 - 9/2026

Ho Chi Minh City University of Technology
GPA: 3.12
